Jaret Rubio Delgado

Mechatronics Engineering Student — Tecnológico de Monterrey • DHIK Exchange Student — Hochschule Zittau/Görlitz
Nuevo León, México • Zittau, Germany • jaret.jrd@gmail.com • linkedin.com/in/jaretrubiodelgado
Portfolio: jaretjrd-source.github.io/portafolio

Professional Summary

Mechatronics Engineering student at Tecnológico de Monterrey with hands-on experience in industrial automation and industrial networking, built through academic projects and a professional internship. During that internship I also began exploring platform development, including backend and frontend basics. I am currently part of the DHIK double-degree exchange program in Electrical Engineering at Hochschule Zittau/Görlitz (Germany), for the 2026/27 winter semester. Strong interest in manufacturing optimization, industrial networking, and platform development, combined with data-driven decision-making.

Experience

Industrial Networks Research Intern Jun 2026 – Sep 2026 (3 months)
Neoterra Lumina *Hermosillo, Sonora, México*

- Contributed to R&D activities focused on industrial networking within a confidential engineering and research environment
- Applied academic knowledge of industrial automation and networking to real-world research projects
- Began exploring software development fundamentals, including backend and frontend basics, alongside core automation and networking work

Robotic Cell Design Project Feb 2026 – Jun 2026
ITESM, in collaboration with ABB *6th Semester*

- Designed a robotic work cell using RobotStudio, applying fundamental robot programming and simulation concepts
- Modeled the cell layout and simulated robot motion paths to validate feasibility
- Gained hands-on exposure to industrial robotics integration workflows

Digital Twin Project Feb 2026 – Jun 2026
ITESM, for Carrier *6th Semester*

- Developed a digital twin of a production line using Siemens Tecnomatix
- Modeled and simulated manufacturing processes to evaluate performance and layout efficiency
- Applied digital manufacturing concepts to support data-driven process improvement

Education

B.S. in Mechatronics Engineering Aug 2023 – Present
Tecnológico de Monterrey *Monterrey, Mexico*

GPA: 93.9 / 100 Expected Graduation: June 2028

DHIK Double-Degree Exchange Program — Electrical Engineering Sep 2026 – Feb 2027
Hochschule Zittau/Görlitz *Zittau, Germany*

5th-semester double-degree exchange, winter semester 2026/27, continuing engineering coursework alongside the Mechatronics program at ITESM. Relevant coursework: Artificial Neural Networks, Microcontrollers.

Skills

Programming:	Python, C/C++, MATLAB, Git/GitHub
Embedded Systems:	Microcontroller programming (STM32, basic), C/C++
Industrial & Automation:	PLC (Siemens, Allen-Bradley/Rockwell, Schneider Electric), Ladder Logic, Universal Robots (UR), Cognex machine vision
CAD & Simulation:	SolidWorks, MATLAB/Simulink, RobotStudio, Siemens Tecnomatix
Currently Learning:	Full-stack web development (self-directed project) — TypeScript, Angular, NestJS, PostgreSQL
Languages:	Spanish (Native), English (B2), German (A2)

Certifications

PLC Fundamentals — Udemy (2026) • e-Series Core Track — Universal Robots (2026) • Cobot Material Handling for the GoFa with Omnicore — Training (2026) • Electrónica Básica y Circuitos Integrados Lineales — ITESM (2025) • Goethe-Zertifikat A2 • TOEFL ITP

Awards

Academic Merit Scholarship (40%) — 2023 – Present
